Andy Molina

(714) 679-6494 | AndyxMolina@outlook.com | Long Beach, CA

EDUCATION

California State University, Long Beach | Expected May 2028
Bachelor of Science, Applied Statistics
GPA: 3.38

SKILLS

- **Languages:** Python, SQL, R, Bash
- **Cloud & DevOps:** Amazon Web Services, Git, Docker
- **Data Science:** Scikit-learn, LangChain, Ollama, Hugging Face, Pandas, NumPy, Tableau, Excel

PROJECTS & EXTRACURRICULAR

Long Beach Racial and Health Equity Research | Data Scientist | June 2025 - September 2025

- Directed by the City of Long Beach to update inequality boards using current U.S. Census data, contributing to the analysis of pressing socio-economic issues and policy-making decisions in the city.
- Utilized the Tidycensus package in R to extract Public Use Microdata Sample (PUMS) data, enhancing data-driven insights for city planning and resource allocation.
- Processed and cleaned over 5 million rows of census data, focusing on 500+ relevant variables for Long Beach, streamlining data for efficient analysis and decision-making.
- Developed new, custom variables to address specific socio-economic challenges unique to Long Beach, ensuring the data captured the nuances of local issues.
- Created interactive Tableau dashboards that visualized key findings, making complex data accessible to both city officials and residents, facilitating better understanding of inequality trends.
- Collaborated with cross-functional teams, including local government and social scientists, to ensure that findings were actionable and aligned with city objectives.

Insights for Profitability in the App Store and Google Play | Data Scientist | June 2025 - September 2025

- Conducted comprehensive market research to identify profitable app profiles and characteristics that drive success in the App Store and Google Play markets.
- Analyzed app features, user demographics, and market trends using Python (Pandas, NumPy) for data manipulation and insights extraction.
- Leveraged data visualization tools (e.g., Matplotlib, Seaborn) to create clear, actionable reports for stakeholders.
- Performed sentiment analysis and keyword extraction from app reviews using natural language processing (NLP) in Python to inform app optimization strategies.

eBay Car Sales Data: Insights into Pricing & Market Trends| Data Scientist | June 2025 - September 2025

- Utilized Python (Pandas, NumPy) to clean, preprocess, and manipulate the raw data for analysis.
- Conducted exploratory data analysis (EDA) to identify key features affecting car prices, including make, model, year, and mileage.
- Visualized trends and patterns using Matplotlib and Seaborn, producing interactive and clear data visualizations for stakeholders.
- Applied regression analysis to predict car prices based on various features, achieving a clear understanding of price determinants.

PROFESSIONAL EXPERIENCE

Mcdonalds | Crew Member | January 2022 - Present

- Provided exceptional customer service, ensuring quick and accurate order processing in a fast-paced environment.
- Maintained cleanliness of workstations and dining areas while assisting with inventory management and restocking supplies.
